SELF-DIRECTED VIOLENCE WORKSHOP

Protect International is pleased to present a 2-Day Self-Directed Violence Workshop in partnership with MacEwan University. The workshop is taking place between 10-11 June 2019 in Edmonton, Alberta.

This workshop will provide an opportunity to learn new skills and build on existing skills in assessing and managing risk for self-directed violence (suicide). In recent years, there has been an emphasis on the importance of using structured methods that incorporate clinical judgment and evidence-based guidelines to assess and manage risk for self-directed violence rather than relying solely on clinical judgment, basic checklists, or actuarial methods.

During the 2-Day Workshop, participants will learn about general principles of risk assessment and management and the use of the Self-Directed Violence-20 (SDV-20) for assessing and managing risk for self-directed violence. The SDV-20 is a set of guidelines for comprehensive assessment and management of self-directed violence developed according to the Structured Professional Judgment (SPJ) model. It is based on research, supported by best practice, and acceptable in a court of law. Successful completion will be recognized with a certificate of completion for each participant.

Thousands of professionals from hundreds of settings across the world have taken part in our workshops to date and the procedures developed by our Threat Assessment Specialists are among the most widely used in the field. Our violence risk assessment and management workshops are the only ones in this field that have been subjected to systematic empirical research and evaluations indicate that the vast majority of participants recommend our workshops.

WHY ATTEND?

Develop your skills

Build your expertise when making decisions about cases that involve future risk of self-directed violence.

Implement best practices

Learn about best practices related to assessing past incidents of self-directed violence or assessing and managing risk for future self-directed violence to help prevent future harm and protect from liability.

Network with others

Strengthen your relationships with other professionals with a shared interest in and responsibility for self-directed violence risk assessment and management.

WHO SHOULD ATTEND?

The Workshop is relevant for professionals within higher education settings interested in assessing and managing risk for self-directed violence, including: administration, human resources, student services, faculty relations, resident life, legal, and security. It will also be relevant to stakeholders in the community with whom they collaborate such as law enforcement, social services and health care.

Workshop Overview

JUNE 10

Principles of self-directed violence risk assessment and management

- The nature of self-directed violence and self-directed violence risk
- Principles of self-directed violence risk assessment focusing on Structured Professional Judgment (SPJ)
